# Government Common Character Set (GCCS)

## Version 2.0 (Draft)

(May, 1999)

**Prepared by**

Official Languages Agency

## Explanatory Notes

1. The *Government Common Character Set (GCCS) Version 2* consists of 4218 characters, of which 2952 are from *GCCS Version 1* while 1266 are additional characters.

2. As far as *GCCS Version 1* is concerned, 72 characters have been unified with characters in the basic Big-5 set (see Appendix I) and 25 characters cannot be verified and may be deleted or retained for compatibility (see Appendix II).

3. In this draft, the characters are ordered by their serial numbers and their provisional Big-5 codes, fonts, Changjie codes (倉頡碼) and relevant source information are included.

4. Key to the source information:

| | |
|---|---|
| **Name** | Characters used in names of people, companies and places. These characters are found in the Chinese Commercial Code set of the Immigration Department, the database of the Inland Revenue Department and the Companies Registry and the telephone directory. |
| **SCJK5.0** | Characters found in SuperCJK5.0. Super CJK5.0 includes all characters in ISO10646 and Extention A, as well as all characters to be included in the Extention B. |
| **Dictionaries** | Characters found in 《康熙字典》, 《漢語大字典》, 《漢語大詞典》and 《中華字海》. |
| **Scientific Term** | Characters used in scientific terms but not included in the above dictionaries. |
| **Colloquial Cantonese** | Characters used in colloquial Cantonese expressions but not included in the above dictionaries. |

5. Besides Chinese characters, 176 Japanese hiragana and katakana letters are included in *GCCS Version 2* (see Appendix III). These letters exist in the *GBK* standard and some of them are found in the database of the Companies Registry.
